## Installation

Please start setup by doubleclicking the installation file.

 TNG LTR Xml Converter 1.0.6

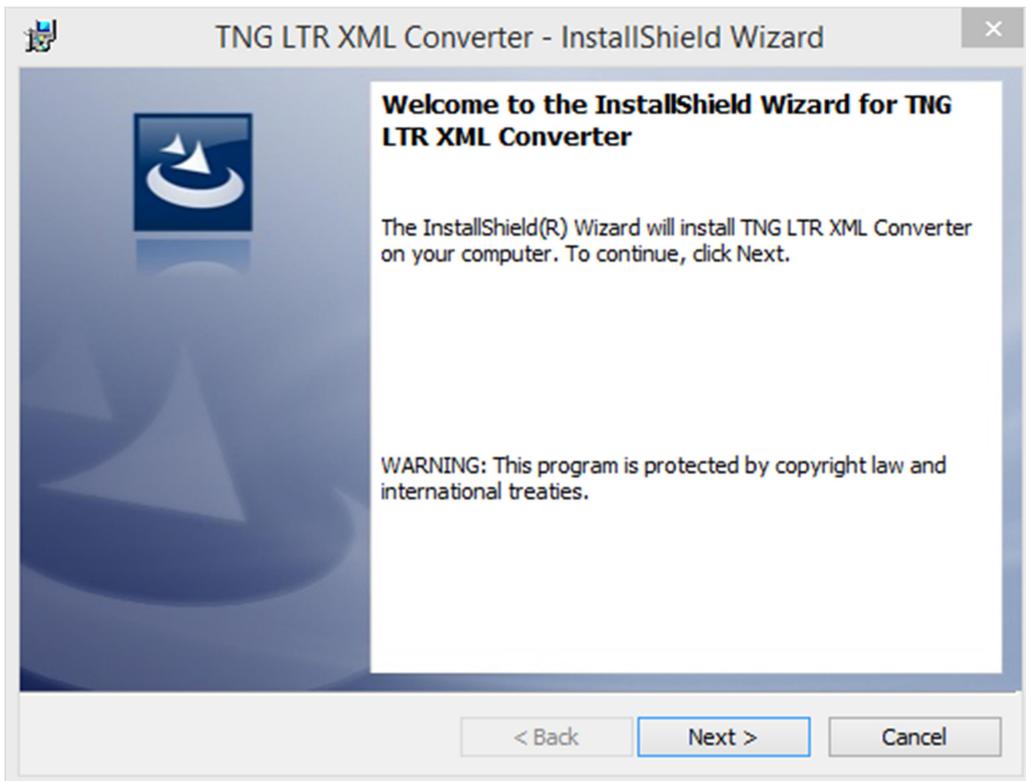

(valid for version 1.06 or higher).

### Authorization

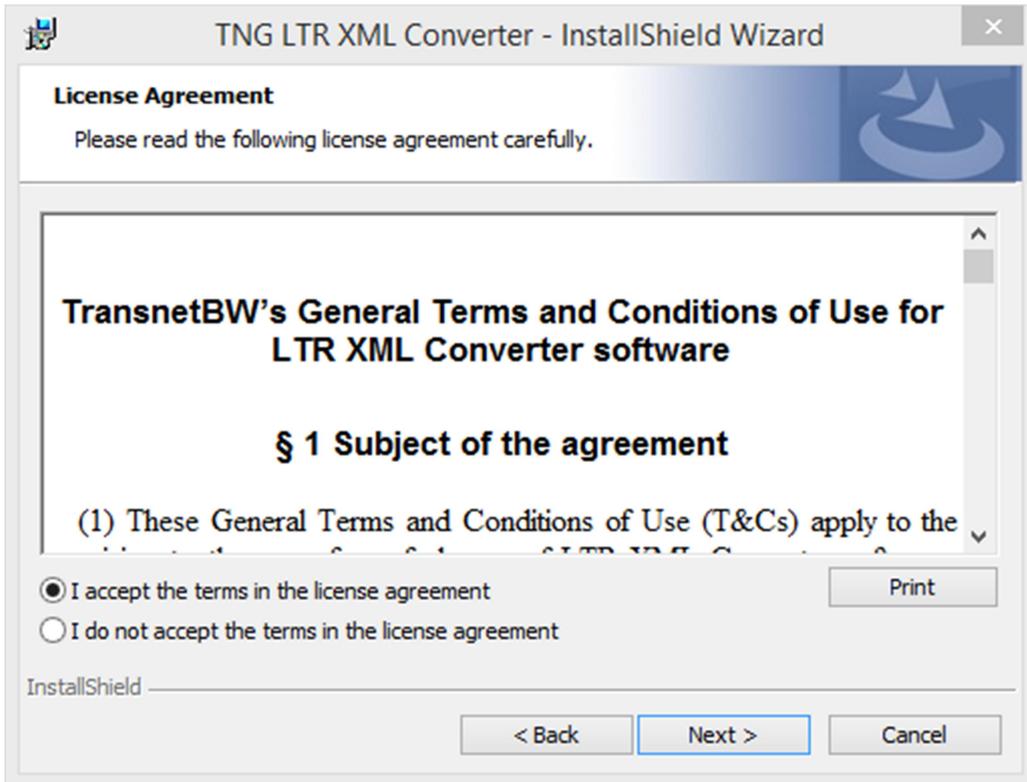

User Account Control may request Administrator permission. In this case, confirm the message if your user has local administrator rights. If your user does not have local administrator rights, please provide a user with these rights.

### Configuration and installation

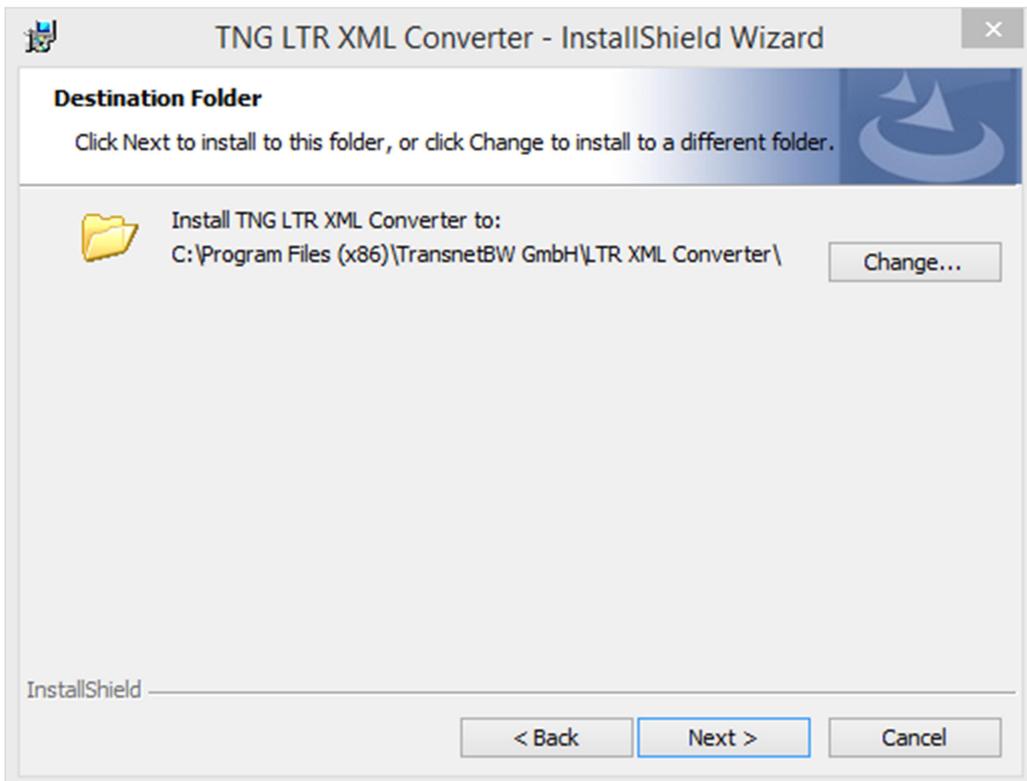

Click on "Next>" in the welcome dialog.

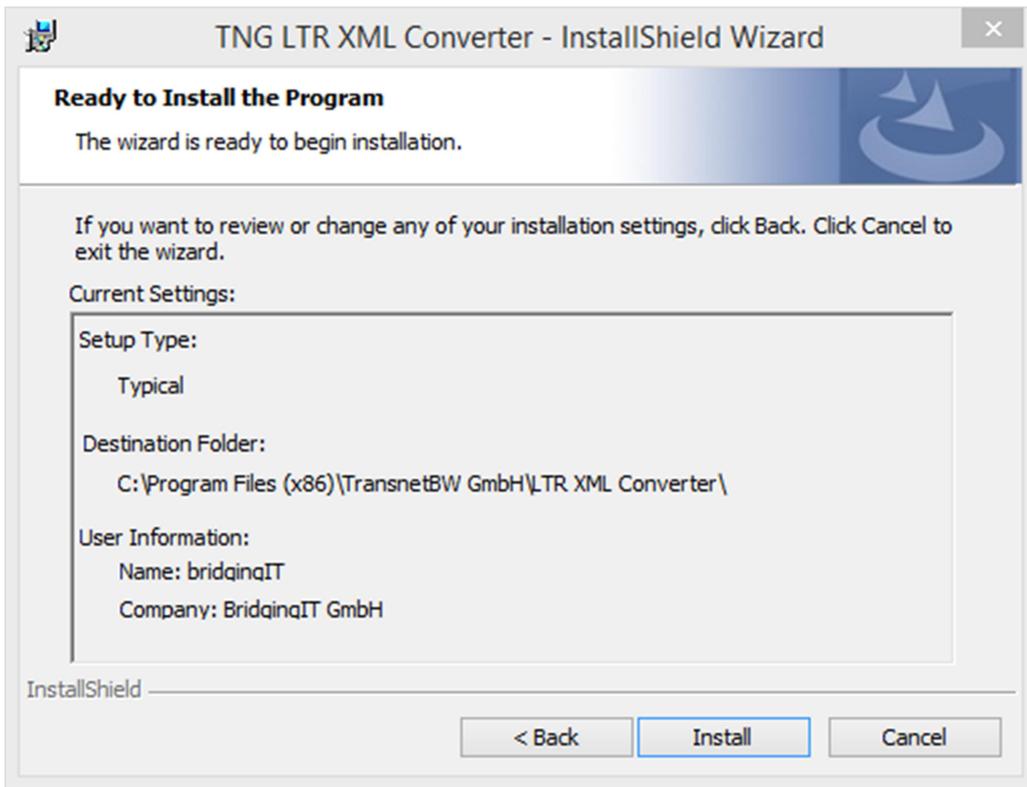

In order to run the setup, you must accept the terms of the license by selecting "I accept the terms in the license agreement" and confirm your selection with "Next>".

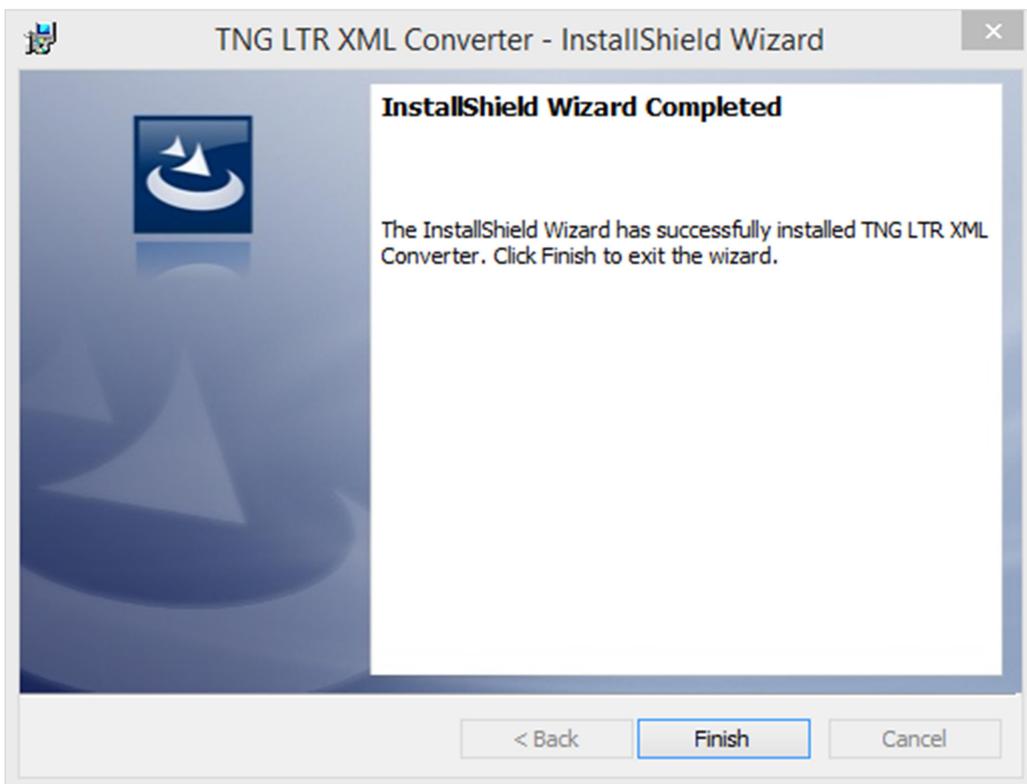

Adjust the installation directory according to your requirements and click on "Next>".

Perform the installation by clicking on "Install".

Complete the installation by clicking on "Finish".

## Repair

A repair is possible only with an already existing installation.

### Running the setup

Start the setup by double-clicking on the installation file.

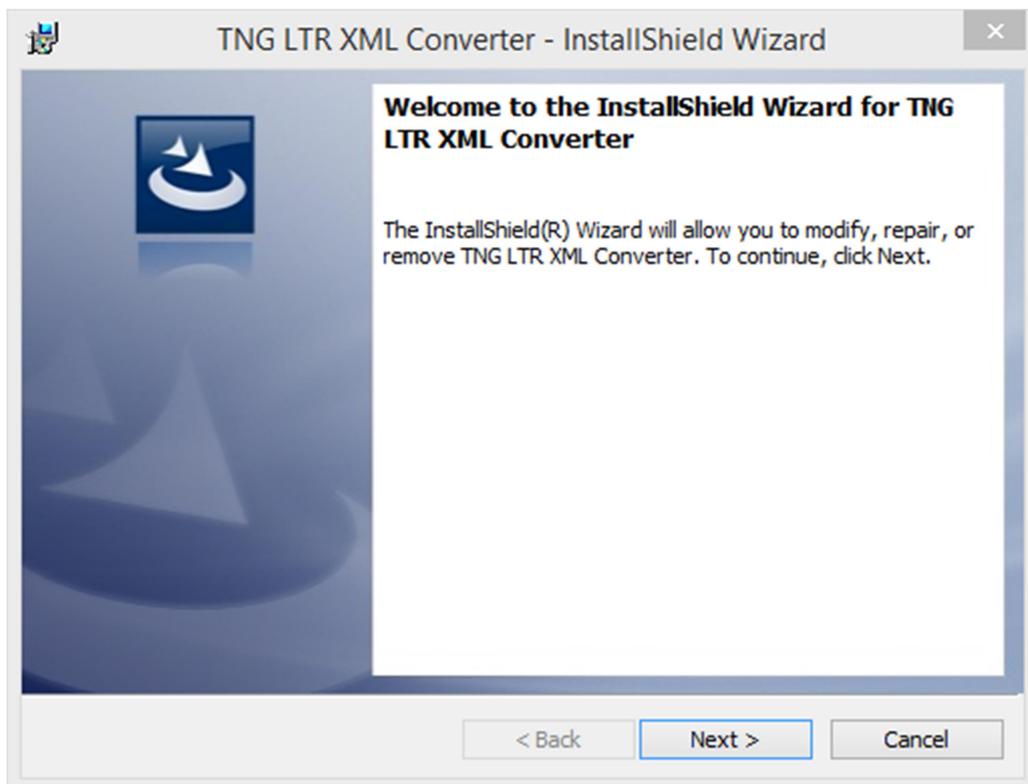

(valid for version 1.06 or higher).

### Authorization

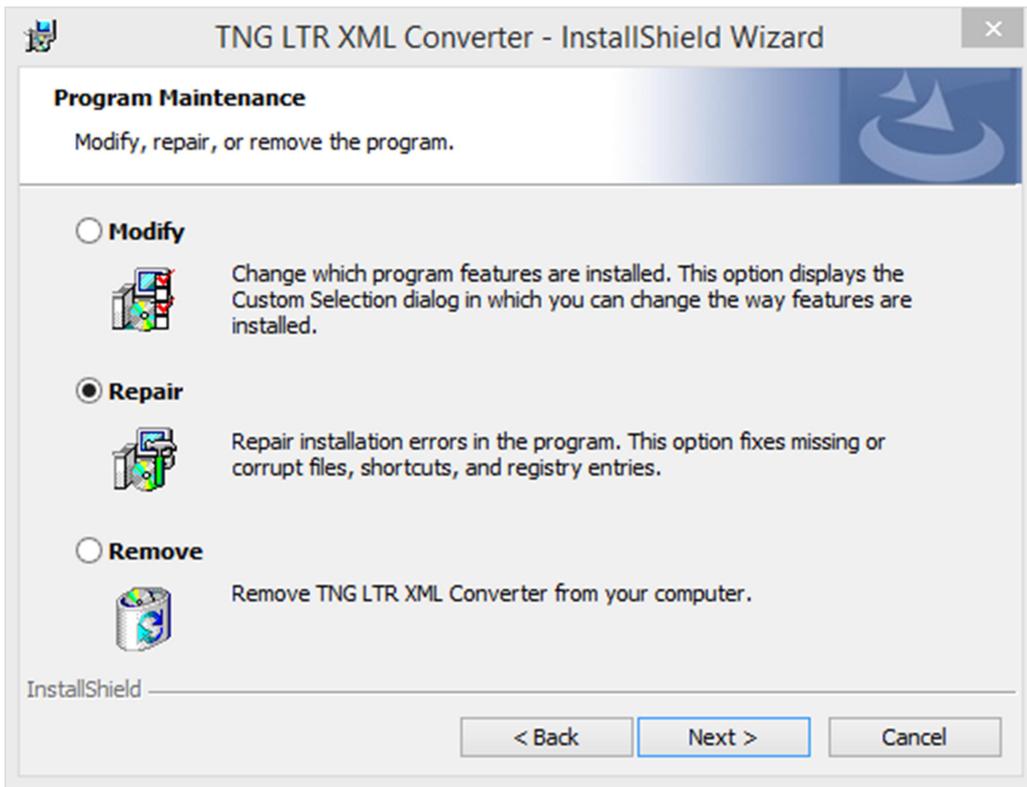

User Account Control may request Administrator permission. In this case, confirm the message if your user has local administrator rights. If your user does not have local administrator rights, please provide a user with these rights.

### Configure the setup and repair

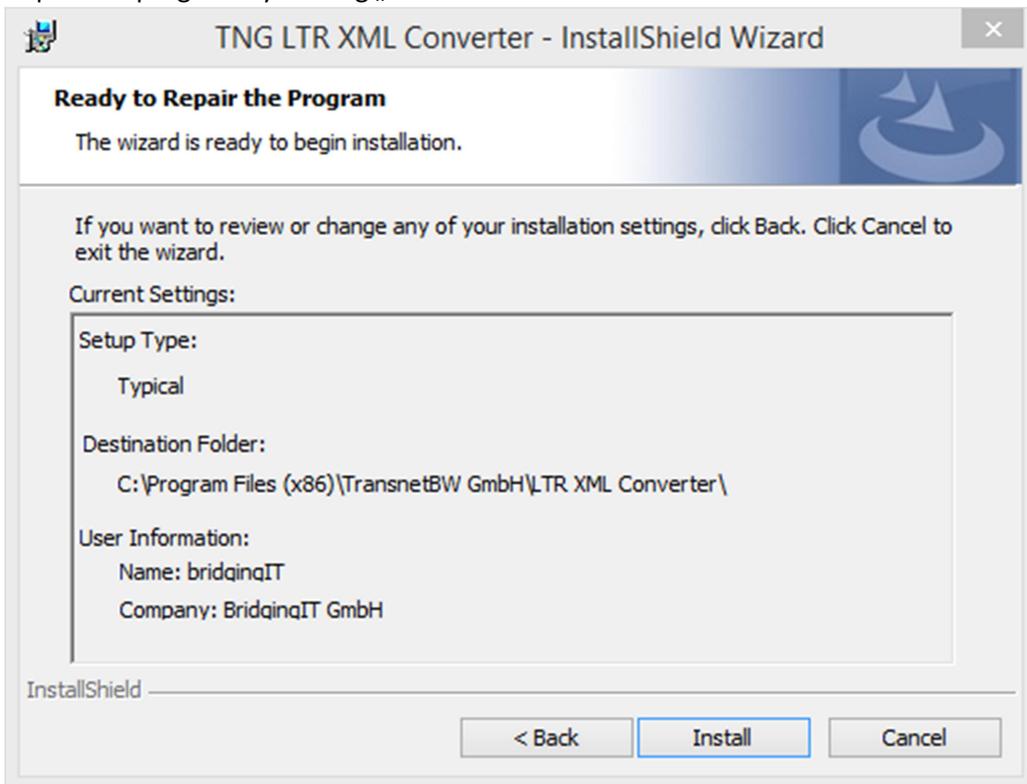

Click on "Next>" in the welcome dialog.

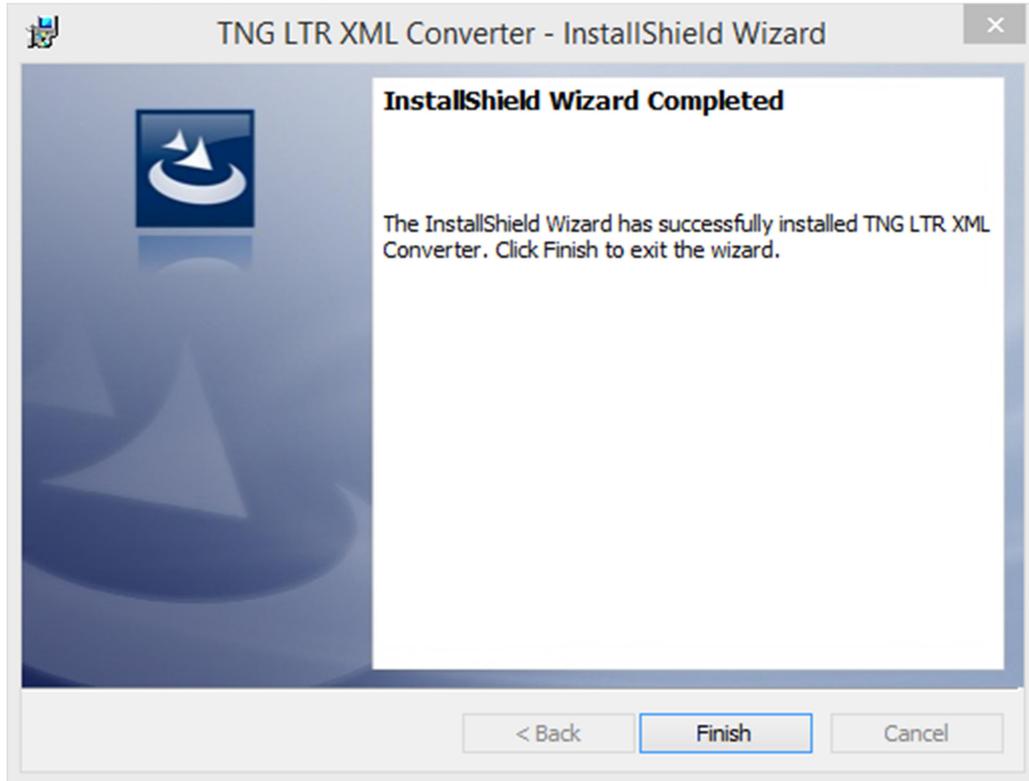

Please choose „Repair“ and confirm your selection with „Next >“

Repair the program by clicking „Install“.

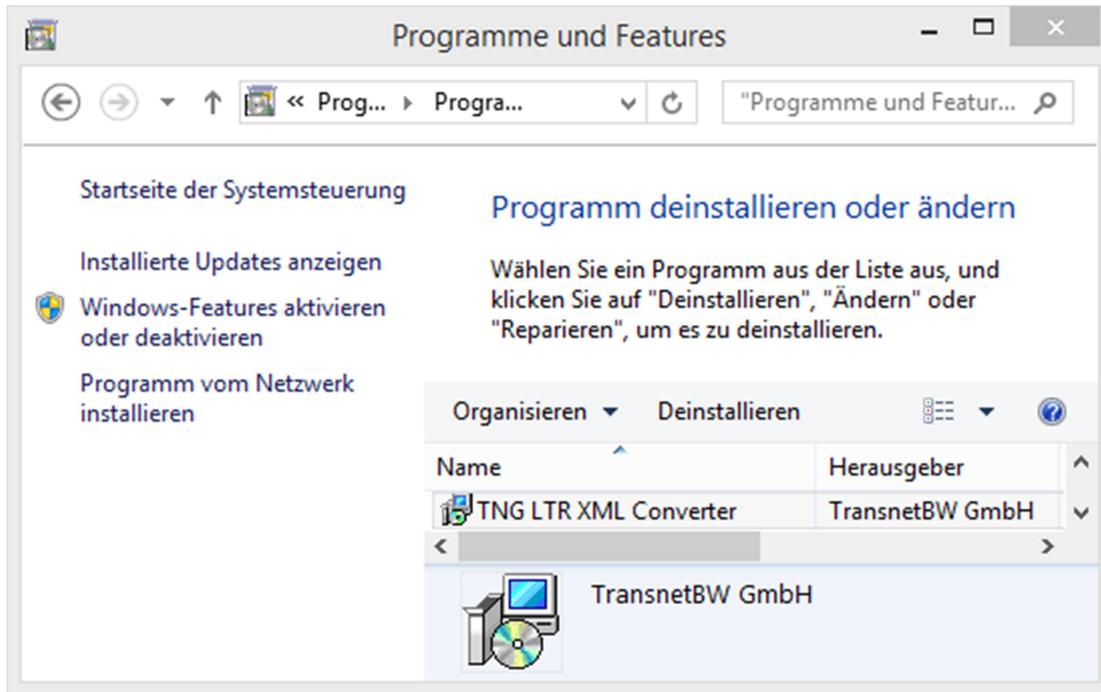

Complete repair by clicking „Finish“.

## Uninstall

Open the Control Panel and select "TNG LTR XML Converter". Click on "Uninstall" to start the uninstallation.

### Authorization

User Account Control may request administrator privileges if necessary. In this case, confirm the message if your user has local administrator rights. If your user does not have local administrator rights, please provide a user with these rights.

### Uninstall

Wait for the uninstallation to complete.

## Troubleshooting

If you have problems installing or using the application, contact 'frontoffice@transnetbw.de'.

### Error after installing another version of LTR XML Converter

If errors occur after installing another version of the LTR XML Converter, you may need to delete the configuration file of the application.

Type the following path into a file explorer:

```
%AppData%\Microsoft\Templates\LTR_Xml_Converter
```

and confirm the entry.

There should be only the configuration file (`LTR_Xml_Converter.config`) – delete it.

The configuration file must be deleted in case of errors for every user and after every installation. It is recommended to delete the configuration file after each installation (for every user).

Another version of this product is already installed

If you receive the following error message, you must uninstall the current version of the LTR XML Converter. Go to chapter 'Uninstallation'.

Visual Studio 2010 Tools for Office Runtime

Sometimes the installation of *Visual Studio 2010 Tools for Office Runtime* is helpful for the installation of the LTR XML Converter. Please check if the *Visual Studio 2010 Tools for Office Runtime* are already installed. If not, please install them first.
