## CWE FLOW-BASED MARKET COUPLING

**Subject: Public Consultation process to start on 2<sup>nd</sup> May 2013**

Dear Market Participant,

The CWE Flow-Based Market Coupling (FB MC) project partners have worked out a Public Consultation document giving further details about the final design and implementation of the FB MC but also addressing topics on which they are seeking the valued opinion of market parties.

**The Public Consultation document will be available on CASC's website and additionally published on some project partners' websites on 2<sup>nd</sup> May 2013.**

The document provides a detailed insight in the Flow-Based methodology by describing the FB capacity domain calculation and also gives more details about the FB parameters publication, fall-back and rollback arrangements, intuitiveness and data publication.

An online survey will be at your disposal in addition to this document, allowing free comments about all topics addressed in the consultation document and asking for your feedback on specific questions for which the CWE FB MC project partners would need your input. We would like to remind you that only comments made via this channel can be officially taken into account by CWE project partners and regulators.

**You will receive the invitation via email on 2<sup>nd</sup> May to respond to the online survey until 30<sup>th</sup> of June 2013 at 00:00.**

Please note that responses on this consultation will be communicated in a non-anonymous way to regulators after consolidation. Market participants will be provided with anonymous results.

Best regards,

**The CWE FB MC project partners**
